Back-End разработчик

Обо мне

Backend Developer with 5+ years of experience building scalable, reliable, and production-ready systems using Node.js, TypeScript, and NestJS.

I specialize in designing backend architectures for online schools, Telegram-based platforms (bots & mini apps), e-commerce solutions, and custom SaaS products — from idea to stable production.

I focus on clean architecture, performance, and long-term maintainability.

Comfortable working with microservices, Dockerized environments, asynchronous workflows, and complex third-party integrations (Google, YouTube, Shopify, Telegram Bot API, etc.).

I also actively contribute to improving development processes through automation, CI/CD, and DevOps practices, helping teams ship faster while keeping systems stable and predictable.

Key skills:

Node.js (TypeScript), NestJS, PostgreSQL, MongoDB, Redis, ClickHouse, Nx, Docker, Nginx, GitHub Actions, GitLab CI, Telegram Bots & Mini Apps, API integrations, Puppeteer.

Open to: remote opportunities (full-time or contract), long-term projects, and backend challenges where architecture quality and system reliability truly matter.

Опыт работы

Back-End Developer · QTIM · Кишинев
Май 2021 - Ноябрь 2025 · 4 года 7 месяцев

Developed and maintained multiple backend services and web platforms, including e-commerce solutions, online schools, payment systems, donation platforms, and Telegram-based products.

Worked on Telegram bots and Telegram Mini Apps, building scalable backend services and integrations using Telegram Bot API.

Used Nx for structuring and maintaining mono-repositories with multiple services and applications.

Participated in system architecture decisions and took leading responsibility on several projects.

Key responsibilities:

Backend development using NestJS & TypeScript

Категория: B
С личным авто

Designing REST APIs and business logic
Development of Telegram bots and Mini Apps
Integration with Telegram Bot API
Monorepo architecture using Nx
Working with PostgreSQL, query optimization, indexing
Using Redis for caching and background jobs
Integration with third-party services (payments, external APIs)
Dockerization of services and CI/CD setup
Nginx configuration and server deployment
Supporting and scaling production systems
Skills:
NestJS · TypeScript · Node.js · PostgreSQL · Redis · MongoDB · Nx · Telegram Bot API · Docker · CI/CD · Nginx · REST API · Git

Навыки: Docker, Restful API, TypeORM, PostgreSQL, Redis, NestJS

Front-End Developer · Creative Market · Кишинев
Февраль 2019 - Сентябрь 2020 · 1 год 8 месяцев

Developed and maintained web applications and websites using Vue.js / Nuxt.js and WordPress for custom client projects.

Worked on custom WordPress themes and plugins, tailored to specific business requirements, including integrations with external APIs and backend services.

Collaborated with backend developers and designers, participated in feature development, performance optimization, and long-term support of production projects.
Key responsibilities:
Frontend development using Vue.js / Nuxt.js
Development of custom WordPress themes
Development of custom WordPress plugins (PHP)
Integration with REST APIs
Website maintenance and content customization
Performance optimization and bug fixing
Skills:
Vue.js · Nuxt.js · WordPress · PHP · JavaScript · REST API · Git

Навыки: Restful API, Git, JavaScript, Php, WordPress, Vue

SEO - специалист и контент менеджер · GSO Company · Кишинев
Октябрь 2018 - Февраль 2019 · 5 месяцев

Продвижение сайтов и настройка SEO а так же заполнение контента.

Желаемая отрасль

- ИТ, Технологии
