React Frontend Developer

Despre mine

My name is Igor. I'm currently a front-end developer and have been excelling in this

field for quite some time.

Since I developed an interest in server and mobile development, I delved into

technologies such as Node.js, SQL, and React Native/Expo. I really want to move to

the position of a Fullstack developer with a focus on React and Node.js or React

Native. I have experience developing both commercial and personal projects using

the latest standards.

I am always ready for challenges and strive to master new technologies. I strive to

fully immerse myself in the projects I work on and actively seek out opportunities to

learn and grow. I will be glad to share my skills with your team.

Let's discuss how I can benefit your company.

JavaScript, ES6+

TypeScript

React

React Redux & Toolkit

React Native/Expo

Next.js

NodeJS/Express

PostgreSQL

MongoDB

CSS (preprocessor, modules, component)

JWT

StoryBook

Postman

Docker

Figma, Adobe Photoshop, Canva, Zeplin

GitHub, Bitbucket, through terminal &

SmartGit & SourceTree

Atlassian (Jira, Confluence)

Experiența profesională

React Frontend Developer · Technology Oriented · Chișinău

Ianuarie 2024 - Prezent · 1 an 6 luni

While working at Technology Oriented, I developed a highly functional UI for

StoryBook. My work included the following key responsibilities and achievements:

Development and improvement of the user interface to improve the usability of

the story book library.

Project development that helps test the quality of customer service.

React Frontend Developer · RapidAsig · Chișinău

August 2022 - Prezent · 2 ani 11 luni

While working at RapidAsig, I specifically developed the user interface for various

calculators designed for insurance calculation both for automobiles and individuals.

My work included the following key responsibilities and achievements:

Designing and optimizing the user interface to enhance usability and improve

the user experience.

Conducting complete redesigns of certain projects, as well as code

optimization.

Integrating with backend systems for data exchange and ensuring the

functionality of the electronic calculator.

Studii: Medii
