QA Engeineer

Despre mine

Greetings!!! I am a software testing professional dedicated to quality and reliability.

Throughout my career, I have successfully participated in projects for leading companies where my work has contributed to high customer satisfaction. I specialize in functional, automated and manual testing, ensuring complete test coverage and critical bug detection. My expertise in Agile, Scrum, Postman, Selenium, BackstopJs, JMeter allows me to effectively handle a variety of tasks. I am always striving for self-development and keep up to date with innovations in the testing industry to stay on the cutting edge. My communication skills and ability to collaborate effectively with developers and other team members make me a valuable member of project teams.

I pride myself on my ability to adapt quickly to changing conditions and am ready to apply my experience and skills to new challenges in the world of software testing.

Postman, API Testing, Selenium Web Driver, Functional testing, Non-functional testing, JIRA, Agile Scrum,

Performance Testing, JMeter, Test documentation
