but also fostered a cross-functional understanding of the development pipeline.

- Skillfully utilized Redmine not just as a tool, but as a collaborative platform, making it straightforward to keep things organized. This approach eased task tracking and prioritization of important tasks in the team's workflow.

- Conducted thorough code reviews for every team task, ensuring adherence to coding standards and providing constructive feedback to enhance the team's coding skills.

- Provided guidance on best practices, coding techniques, and problem-solving strategies, contributing to the professional growth of team members.

- Introduced new tools and techniques to enhance development processes, resulting in increased efficiency and code quality.

- Organized knowledge-sharing sessions within the team, facilitating the exchange of ideas, tips, and tricks to improve overall technical proficiency.

- Organized team-building activities to strengthen camaraderie and foster a sense of unity among team members.

- Collaborated on the development of a commercial project with a team of 5 developers, actively participating in all aspects of the MERN stack. Similarly, contributed to an internal project with another team of 5 developers, demonstrating versatility by engaging in diverse responsibilities across frontend, backend, and database tasks for both projects.

- Leveraged MongoDB in conjunction with Express to architect and implement robust routes catering to all CRUD operations, ensuring data management.

- Independently tackled a range of responsibilities, including frontend development, backend implementation, and database management across the entire stack.

- In teamwork, I collaborated with my colleagues on more complex tasks. We pooled our skills to meet deadlines and deliver solutions.

- Leveraged my skills in MobX for state management, enabling smooth and reactive application behavior.

- Implemented Tailwind CSS to streamline and enhance the styling of the user interface, ensuring a responsive and visually appealing design.

- I have experience with Redmine, an open-source project management and issue tracking tool. I've utilized Redmine to efficiently manage and track project tasks, milestones, and issues, ensuring a systematic approach to project development.

- Designed and implemented reusable functional components using React, styled components and

Ant Design, and Javascript and TypeScript to provide optimized and maintainable code for various web applications.

- Integrated with RESTful APIs to fetch and display data from the back-end services.
- Developed functional and user-friendly forms using react-hook-form.
- Implemented state management using tools like Redux to manage the application's state efficiently.
- Utilized Git for version control, collaborating with team members and managing code repositories effectively.
- Implemented security best practices, including input validation, to protect against common web vulnerabilities.
- Tracked tasks efficiently with Jira for streamlined project management.

Studii: Superioare

Universitatea "Dunarea de Jos" din Galati

Absolvit în: 2022

Facultatea: Facultatea de Automatică, Calculatoare, Inginerie Electrică și Electronică

Specialitatea: Calculatoare
