IT Support

Despre mine

-To ensure the correct functioning and maintenance of all internal and external customer IT
equipment and services.

-Answering the calls, approximately 70 calls per week. Create the incidents and resolve them.

-Maintenance of work stations: solving various soft/hard problems (component
replacement).

-Installation/configuration of software packages, installation/configuration peripherals and
resolving possible technical incidents.

-Ensure that all activities are completed and documented in accordance with the required
standards, methods and procedures.

-Carry out local repairs of faulty equipment and services to the highest standards and
coordinate the resolution with the appropriate resolver group.

-Manage the replacement of faulty equipment through the use of spares, and ensuring the
timely replenishment the spare according to prescribed availability and sparing policy.

-Manage local suppliers in the provision of services for the SITA Field Operations center and
report on services provided to management.
