Python Developer

About me

I am a second-degree student at "Alexandru Ioan Cuza University," specializing in Business Information Systems. Passionate about technology, I am focused on advancing my skills in web development with Python (Flask, Django), databases, and Docker. I am eager to apply my knowledge to innovative projects that bridge technology and business. I would love to be part of a dynamic team where I can contribute to impactful projects, collaborate effectively, and continue growing at the intersection of business and technology.

Desired industry

- IT, Tech

Education: Higher
