Technical Support Specialist

Обо мне

I am looking for a job in System Administration, Technical Support, or Database Maintenance. My interests include studying and gaining work experience in areas such as computer repair, Linux distributions and Windows operating systems administration, database configuration, as well as network design and maintenance.

For two years, I worked as a Junior Linux System Administrator at Unifun. My responsibilities included monitoring hardware and software services on servers, overseeing server health, and troubleshooting issues. I have experience in writing Bash scripts, working with Debian, Ubuntu, and CentOS distributions, setting up new servers, installing and configuring software, and performing database maintenance.

Опыт работы

IT Support and Technical Support · McDonald's · Кишинев

Февраль 2025 - Июль 2025 · 5 месяцев

- Maintenance of kitchen video systems (Dell computers, monitors, cable connection, bump bars).
- Windows OS administration and configuring it according to restaurant requirements.
- Configuring connection between kitchen computers through special application (based on XML).
- Working with servers (server equipment, dell servers, switches, routers, hdmi splitters, network video recorders).
- Installing and configuring POS (Point Of Sale) systems, POS terminals, kiosks.
- Connecting printers and scanners.
- Working with android ADS (advertising displays/monitors).

Навыки: Printers, Scanners, Kiosks, POS Terminals, POS systems, IT Support Operations, Hardware components, Windows OS
