Full-Stack Developer

About me

I am a passionate Angular Full-Stack Developer with over a year of experience building scalable and high-performing web applications for international companies. During a two-year pause from my career, I served as a volunteer for the Church of Jesus Christ of Latter-day Saints, where I honed my English communication skills, gained invaluable experience working with diverse people, and developed strong adaptability. I thrive on continuous learning and growth, staying up-to-date with the latest technologies to improve my expertise in both computer engineering and languages.

Work experience

Full-Stack Developer · Existek · Vinnytsia, Ukraine

November 2021 - January 2023 · 1 year 3 months

Collaborated closely with a designer to develop front-end pages for an online portal, transitioning an American garage firm from paper-based documents to a fully digital platform. Contributed to the backend by designing and implementing core data models to ensure robust functionality.

Collaborated closely with Norwegian product manager to analyze and migrate functionalities from a legacy application (having their code in Norwegian) to a modern web platform, ensuring no feature loss, by working in close with product manager from Norway.

Skills: ASP, .NET, ReactJS, Js, Node, Angular
