About me

Full-stack developer with experience in creating web, desktop, and microservice applications. Specializing in API development, CRM integrations, parsing systems, and business process automation. Proficient in version control systems, cloud services, and containerization.

Technologies:

Backend: C# (WinForms, WPF, ASP.NET Core, EF Core), Java (Spring Boot), Python (Flask, FastAPI, Django), Node.js (Express), Php(Symfony, Laravel)

Frontend: HTML, CSS, JavaScript, TypeScript (Angular)

Databases: MsSQL, PostgreSQL, MySQL, SQLite

CRM Integrations: Bitrix24, AmoCRM

Infrastructure: Docker, Nginx, Ubuntu, Git

Additionally: web and API parsers, website data scraping, Telegram bot development

Constantly learning new technologies and approaches. Able to work independently as well as in a team. Focused on results and code quality.

Work experience

Full-Stack Developer · individual entrepreneur · Tiraspol

October 2024 - Present · 12 months

Programming of software products of any complexity in c#, java, python, php, node.js, angular, etc.

During this time, three products have been developed

1) Debt site parser written in node.js, and sending data to Bitrix24, while capturing data from the reputation API

2) Verification of Excel documents written in node.js. The program receives document data via API in the form of Base64 and back with error information+ recolors errors in the Excel file, and uses the My SQL database as a template for reconciliation

3) Getting data from AmoCRM to create requests in restaurants via API, the product is completely written in php.

Development a personal project, messenger Asp.Net+Angular+Postgresql+nginx+docker, using signalR/Hub.

Support in the development of the Moskino and Tiravto projects, which use .NET and Angular technologies.

Skills: ASP, .NET, Angular, Telegram bot, PostgreSQL, MySQL,

- MySql
- PostgreSql
- Angular (typescript)
- Ef Core
- Java
- Php
- Python
- Node
- Js
- Docker
- Nginx
- Git

Microsoft SQL Server, Orm, Crm, Restful APIs, NodeJS, PHP (Programming Language), Python (Programming Language), C Sharp (Programming Language), Java (Programming Language), Docker, Git, Github, Gitlab

Desired industry

- IT, Tech

Education: Higher
