Contributed to the DocBridge Gear project, focused on automating document processes. Improved the UI using company's TypeScript-based WUI framework, resolving bugs and enhancing user experience. In the backend, worked with Node.js to connect various services like RabbitMQ, Amazon S3, Kafka, and to create conversion methods/functions for streamlined document automation. Proficient in XML and XSD data modeling for both frontend and backend. Actively involved in Mocha and Jest unit testing. Collaborated effectively within the SCRUM framework for seamless teamwork.
