I am a beginner programmer but I already worked in SEO marketing and practiced online store management. I worked for a year in Allied Testing as a Manual Tester. After, on the recommendation of a friend I worked in Trivium for 5 months as Amazon PPC Strategist. I have skills in programming theory like JavaScript, Node.js, advanced HTML, and a bit of PHP. In the last year I have passed 4 courses to improve my English to B2. I also have passed some courses about testing and Microsoft Excel (required for my previous job).
