Continuous improvement specialist

Despre mine

- Creating and editing 2D,3D objects using various commands
- Proficiency in mathcad program for simulating and analyzing machine dynamics
- Ability to analyze the motion of various machine components, including linear and rotational motion, velocity, acceleration, and relative displacement

Experiența profesională

Continuous Improvement Specialist ·

DRAEXLMAIER, Cahul · Cahul

Mai 2022 - Mai 2023 · 1 an 1 lună

Implementation of continuous improvement process (KVP) projects launched together with the production, logistics and quality department.

Responsible for collecting, evaluating and implementing suggestions for improving production, logistics, engineering and quality processes.

Supervision of production, logistics, quality staff for the use of management methodology (6S Lean Management in manufacturing: sort, set, shine, space, standardize, sustain, safety).

Organize and support workshops on lean management (6S, 5Why, 7Wastes, Kaizen approach, PDCA Cycle, Value Stream Mapping).

Performing courses to improve the knowledge and skills of the employees listed above.

Cooperation in defining and monitoring key performance indicators (KPIs)

Technical Planner · DRAEXLMAIER, Cahul · Cahul

Iunie 2021 - Aprilie 2022 · 11 luni

Use of AutoCAD software, to design and implement wiring parts and equipment safety parts to improve workflow.

Developed design drawings for production flow analysis to identify ways to reduce production time and improve efficiency, where we designed the protective housing for the Porsche Macan

Categoria: B

wiring harness that reduced errors by 95%.

Conducting tests following mistakes in production such as (wrong entries, safety testing, tool testing, timing of work processes).

We developed technical drawings to be passed on to internal executives in the departments :

logistics, engineering, quality, production, security, which optimized the work process and the workplace.

Together with the IT team, we created a

program for the power station that records faults created in the wiring to optimize the process of identifying errors occurring during the workflow.

I was part of the analysis team in the engineering department where I created a spreadsheet (Excel) that filtered errors by: working days, shift, workstation, housing code and cable code, which optimized the work process and reduced error finding time and extra expense

Group Leader - Logistics Department ·

DRAEXLMAIER, Cahul · Cahul

Noiembrie 2020 - Mai 2021 · 6 luni

Organize and prepare workstations and materials for operations necessary to maximize production.

Carry out verification of transport documents for deliveries.

Ensuring that products have been manufactured on time and are of high quality.

Dispatching and checking documentation of goods transported in accordance with the customer's order.

Perform inventory control and reports on warehouse stock and production turnover rate.
