PHP, SQL, OOP, MVC, Symfony, Laravel, Drupal, MySQL, MongoDB, GIT, Selenium, phpunit, blackfire.io, xhprof, xdebug, Javascript, jQuery, ExtJS, React, Cypress, OpenAPI (Swagger), Linux, Windows, Mac OS

Experiența profesională

Senior PHP developer · Adev Group · Chișinău

Iunie 2022 - Prezent · 2 ani 11 luni

Finceptiv - The project gives the possibility to users of getting a loan from one of the partners which work with Finceptiv.

On this project, I mainly participated as a PHP (Symfony) developer, and from time to time added new functionality to the frontend part, built on React with TypeScript. My main responsibilities - the integration of third-party REST and SOAP APIs. Each integration is covered with Unit tests. I improved several back-office pages by optimizing requests to the MySql database. Implemented new business requirements related to the main project workflow.

Stazzle - Service connects hospitals, clinics, and businesses with medical personnel providers.

As a participant in the backend team, I was responsible for developing REST API following the SOLID principles. For REST API documentation we used OpenAPI (Swagger). Our team used ECS (Easy Coding Standards), PHP_CodeSniffer, and PHPUnit to increase code quality. We increased code coverage with functional and unit tests to 80%+

Senior PHP developer · Introduct · Chișinău

Mai 2019 - Mai 2022 · 3 ani 1 lună

Cryptowallet - At the beginning of the project, I was responsible for KYC, back-office, two-factor authentication. Later I was moved to the main functionality -creating wallets for different crypto currencies. Make transactions on external and internal cryptocurrency addresses(wallets). Exchange one cryptocurrency on another cryptocurrency through a different exchange broker. Fee calculation for exchange and withdrawal of cryptocurrency.
