QA Engineer

About me

I am a detail-oriented QA Engineer with 3 years of experience in manual and automated testing of web applications. With a strong understanding of SDLC and Agile methodologies, I actively contribute to improving testing processes to ensure the highest product quality. Skilled at analyzing and identifying system vulnerabilities, I enjoy solving complex challenges, collaborating with cross-functional teams, and ensuring a seamless user experience. I am committed to continuous learning and growth in the field of quality assurance.

Looking for: Opportunities as a QA Engineer in a company that values quality, innovation, and teamwork, where I can prove myself, take on new challenges, and showcase my skills.

Work experience

QA Engineer · Invia Travel Germany GmbH · Leipzig
March 2022 - March 2025 · 3 years 1 month

- Ensuring a seamless and reliable booking experience, from order placement to confirmation emails.

- Verifying the accuracy of booking details—hotel, dates, travellers, pricing, insurance, and extras.

Conducting manual and automated testing for payments, email notifications, and data validation.

- Testing the mobile version with BrowserStack, ensuring smooth performance across devices and browsers.

- Evaluating the usability of the website to enhance the user experience.

- Closely collaborating with developers, product managers, and designers to identify and resolve issues.

- Playing a key role in the release process, including regression testing, bug fixes validation, and monitoring post-deployment stability.

Developing and maintaining automated test cases using JavaScript / Playwright.

- Keeping detailed documentation of bugs, test cases, and reports in JIRA / Confluence.

- Actively participating in daily stand-ups, demos, retrospectives, and sprint planning to refine processes and ensure quality.

Skills: Agile Methodology, HTTPS, HTTP, API, White-Box Testing, Black-Box Testing, Mobile Testing, Test Documentation, Automation of Tests, Databases, Browserstack, User Interface Testing, Defect Identification, Test Case Design, JavaScript
