Backend Developer

About me

Backend developer with 4+ years of experience in building reliable API services, Telegram bots, and database architecture using Python (FastAPI, PostgreSQL, Docker).

I design scalable server applications, develop backend architecture, write tests, and set up deployment. I know how to work with production load, solve non-trivial problems, and write clean, maintainable code.

I create and grow my own projects from scratch to production level with thousands of real users. I care about clean architecture, readable code, fault tolerance, and easy project maintenance.

Work experience

CEO / Founder / Developer · Books_base · Saint Petersburg
September 2021 - Present · 3 years 10 months

– Launched a Telegram-based eBook store with user authentication, payment system, internal balance, Premium subscription, and discount system

– Built a scalable backend architecture using Aiogram + FastAPI, PostgreSQL, Redis, and Docker

– Implemented a flexible discount model, news feed, admin panel, access rights, and internal currency

– Ensured stable work and ongoing development of the project, now used by hundreds of active users

– Developed all business logic, API interfaces, UX features, and wrote automatic tests using Pytest

– Refactored the project three times to move to more mature and efficient technologies (FastAPI, SQLAlchemy, Alembic, Docker)

Stack: Python, FastAPI, SQLAlchemy, Alembic, PostgreSQL, Redis, Docker, Pytest, Aiogram, Telegram Bot API

Skills: Backend, Python, FastAPI, PostgreSQL, Docker, Pytest, Aiogram, Pydantic, SQLAlchemy, Alembic, Redis, Telegram Bots, API, Git, Linux

Telegram Developer · Temnomor · Tyumen
September 2023 - May 2025 · 1 year 8 months

- Python
- FastAPI
- PostgreSQL
- Docker
- Pytest
- Aiogram
- Pydantic
- SQLAlchemy
- Alembic
- Redis
- JavaScript
- Nodejs
- Telegram Bots
- API
- Git
- Linux

– Designed and built a Telegram bot for students of MPK TIU college — now the main source of class schedules for 5,000+ active users

– Improved UX and stability, which helped grow the user base several times

– Created a stable schedule parser using Playwright, even with regular blocks and restrictions from the college website

– Set up caching (Redis) and a notification system to keep the bot fast and reliable

– Designed a fault-tolerant backend architecture using FastAPI, PostgreSQL, and Aiogram

– Managed the project's SMM channel and increased user engagement by 40%

Stack: Python, FastAPI, Aiogram, PostgreSQL, Redis, Docker, Pytest, Alembic, SQLAlchemy, Playwright

Skills: Backend, Python, FastAPI, PostgreSQL, Docker, Aiogram, Pydantic, SQLAlchemy, Alembic, Redis, Telegram Bots, API, Git, Linux
