IT Specialist

About me

With more than 6 years of experience in IT support and incident handling, I've built strong skills in solving technical issues and working in team-oriented environments. I have developed strong skills in troubleshooting, SQL querying, customer communication, and issue resolution across multiple IT environments, including POS support, network troubleshooting, and software testing. I stand out through my attention to detail, proactive approach to problem-solving, and ability to collaborate across teams.

In addition, I completed a Front-End Development course, gaining hands-on knowledge of HTML, CSS, JavaScript, and Git – which allows me to bridge the gap between technical support and software development. I am confident that my combined skills in support, testing, and coding enable me to bring value and flexibility to any IT team.

Work experience

Incident Analyst · Stefanini · Chișinău
September 2023 - Present · 1 year 10 months

- Provided technical assistance and support for point-of-sale (POS) applications used by major retailers across Europe.

- Performed application and database checks using MySQL to identify and resolve system incidents.

- Identified, documented, and prioritized incidents to ensure efficient resolution and minimize business impact.

- Ensured quality assurance through proactive monitoring and issue prevention.

- Escalated high-priority risks and unresolved issues to the team leader and incident manager.

- Contributed to the continuous improvement of the incident management process by identifying gaps and proposing enhancements.

Skills: Customer Communication & Support, Problem Solving & Escalation Management, POS Application Support, Transfer Protocols), Remote Troubleshooting (Putty, Jira Ticketing & Issue Tracking, MySQL & SQL Incident Analysis
