Work experience

PHP Developer · NDA
May 2022 - Present · 3 years 2 months

Developed database structure

Developed REST API documentation, postman collections

Developed docker compose services configurations

Developed configurations for docker compose, dockerfiles, nginx, mysql, php, websockets Developed REST API endpoints

Developed background queue jobs, crons

Developed user notifications, chat via websockets

Developed unit, functional tests

Developed GraphQL API

Developed CMS

Developed Magento 2 modules, products import, greeds, GraphQL API endpoints

Developed Magento 2 store deployment, deployed, and optimized Magento 2 stores

Integrated payment system

Integrated third-party services

Deployed Web applications to Production

Experience developing Magento 2 local, development environments

Experience deploying Magento 2 stores

Experience deploying applications to AWS EC2

Experience implementing third-party connections via API

Experience with Magento 2 (creating modules, layout creation, extending out-of-box functionality) Ability to work both independently and as part of a team

Skills: GitHub Actions, Jira, Docker, GraphQL API, REST API, GitHub, Laravel, Magento 2, PHP8

PHP Developer · Coreteka
April 2021 - May 2022 · 1 year 1 month

Implemented Statistics/KPIs indicators for logistic project

Implemented Solr indexing/searching/filtering data for a statistics endpoints Developed Calculation, Currency, Statistics Services

Developed REST API endpoints Integrated Solr support for

- REST API
- GraphQL API
- Docker
- Jira
- GitHub Actions
- RabbitMQ
- Elasticsearch

Laravel Scout Developed statistics data for charts Developed unit, functional tests

Skills: Docker, REST API, MySQL, GitHub, Solr, Laravel8, PHP8

PHP Developer · Geolance
February 2020 - April 2021 · 1 year 3 months

Implemented functionalities:

- payment methods, user bank accounts, user payment methods, user transactions

- currencies with rates, user currencies, project currency, guest/user currency-based amounts

- notifications via sockets, email, telegram

- invoice/receipt generation in user currency

- events broadcasting via sockets

- prioritized background task queue

- projects and users ranking

- admin panel for seo pages

- messenger as a GraphQL API

Developed REST/GraphQL API endpoints Developed unit, functional and integration tests Integrated Elasticsearch to search through text/geo-data of projects, users, seo pages Developed GitLab CI configuration to perform unit/functional and integration parallel testing Performed system migration

Performed testing of the developed software applications and ensured the product delivers expected results

Skills: Docker, Centrifuge, GraphQL APIs, REST, MySQL, GitLab, Elasticsearch, Laravel, PHP

PHP Developer · Datapro
May 2017 - December 2019 · 2 years 8 months

Developed OPML data parser

Developed REST API endpoints

Developed cron commands to actualize data in database

Developed GraphQL endpoints

Developed unit and functional tests

Developed REST API endpoints

Fixed bugs and implemented enhancements that improved functionality

Skills: REST, GraphQL, MySQL, Laravel, Jira, GitLab, PostgreSQL, Symfony, PHP7

PHP Developer · NDA
May 2015 - May 2017 · 2 years 1 month

Developed analytics microservice

Developed REST API endpoints, generated client SDKs and API documentation Developed new functionalities for email microservice

Implemented microservices communication using RabbitMQ
Developed new features
Implemented localization for landing pages

Skills: PHP7, REST, Jira, RabbitMQ, Elasticsearch, Redis, Laravel, JavaScript, PHP5

PHP Developer · Infotor
March 2014 - January 2015 · 11 months

Developed database structure

Developed PHP MySQL application as per the requirements
Developed compatible user interface functionality using jQuery.
Integrated payment systems

Fixed bugs

Skills: Doctrine, Zend, SQL, JavaScript, PHP5

Desired industry

- IT, Tech

Education: Higher

National Technical University of Ukraine "Kyiv Polytechnic Institute"
Graduated in: 2015
