.NET Developer

About me

I'm a .NET developer with over four year of experience in application development and software engineering. Throughout my career, I've worked with various technologies, including WinForms, ASP.NET, SQL Server, and front-end web development using JavaScript, jQuery, HTML, and CSS

Over the years, I've built and maintained enterprise applications, developed APIs, and worked with databases to ensure high-performance solutions. Recently, I've also been expanding my expertise in modern web development, cloud technologies, and containerized environments using Kubernetes and Docker.

I'm passionate about clean code, software architecture, and continuous learning. I enjoy solving complex problems, optimizing applications, and contributing to scalable and maintainable software solutions.

I'm looking forward to new opportunities where I can apply my skills and grow as a developer.

Work experience

.NET Developer · Contract Based · Chișinău
December 2021 - September 2023 · 1 year 10 months
