# System Administrator

## About me

System Administrator and IT Support Specialist. Confident working with Active Directory, Group Policy (GPO), Windows Server, office equipment, and network hardware.

I enjoy quickly diagnosing and resolving issues, ensuring stable IT infrastructure operations, and providing high-quality user support.

Actively developing my skills in system administration: striving to become an indispensable specialist, mastering new technologies, and growing in new directions.

## Work experience

**System Administrator** · InteractiveCenter · Tiraspol  
*September 2024 - Present · 10 months*

- Managed Active Directory: created, deleted, and modified user accounts; assigned access rights; joined workstations to the domain.
- Worked with Group Policies (GPO): moved users and computers between Organizational Units (OUs) to ensure correct policy application.
- Maintained a fleet of 60+ computers: troubleshooting, upgrading, and restoring system functionality.
- Installed and configured network equipment: PoE and standard switches, MikroTik, terminated and tested network cables.
- Restored IP surveillance system: reconnected IP cameras and integrated them into the network.
- Provided user support via AnyDesk: troubleshooting, verifying network connectivity and access to corporate resources.
- Installed and configured printers and peripheral devices.
- Managed Kerio Connect accounts: added users imported from Active Directory.

Skills: DHCP, Active Directory, IP, TCP, Technical Support, DNS
