Delivery Manager, Delivery Lead, IT Project Manager, Agile Coach, Scrum Master

About me

An open, honest, and hard-working professional with strong adaptability and high level of responsibility. I learn quickly, stay focused under changing conditions and consistently maintain a structured and reliable approach to work.

I combine deep understanding of software delivery lifecycle and quality assurance with strong project and team management skills. I effectively coordinate end-to-end delivery processes from project initiation to release, ensuring timelines, scope, and quality expectations are met. I proactively identify and manage risks, facilitate communication across stakeholders and ensure successful and predictable delivery of projects for clients or within the company.

I bring strong leadership abilities and a proven capacity to solve complex technical and organizational challenges. My key strength is effective communication — building trust, fostering productive team collaboration and aligning everyone around common goals to achieve successful project outcomes.

Work experience

Scrum Master · Freelance · Chişinău

November 2024 - Present · 1 year 1 month

Work part time as a freelance Scrum Master on a few individual IT projects / development teams, combining it with learning for an PMI-ACP certification.

- Facilitate Scrum ceremonies and ensure smooth Agile project delivery.

- Remove blockers to maintain team productivity and flow.

- Support Product Owner with backlog refinement and prioritization sessions.

- Track team metrics (e.g. velocity, burndown) to constantly improve performance.

- Foster collaboration, communication, and continuous improvement.

Senior QA Engineer · Amdaris · Chişinău

June 2017 - June 2020 · 3 years 1 month

- Set up and maintain testing environments, ensuring all conditions are optimized for various test activities.
- Develop comprehensive test plans, test cases, and test scenarios based on detailed requirements and project specifications.
- Conduct in-depth functional, regression, stress, usability, UI, and integration testing to ensure software quality and reliability.
- Identify, log, and track defects in the bug tracker, providing detailed reports and collaborating with development teams to prioritize and resolve issues.
- Monitor defect lifecycle and ensure timely resolution, minimizing impact on project timelines.
- Test software releases throughout the development process, providing continuous feedback to ensure high-quality product delivery.
- Generate detailed test reports and documentation, providing insights into test coverage, defect trends and overall product quality.
- Review and analyze technical documentation to ensure alignment with test strategies and requirements.

- Lead, mentor, and guide junior QA engineers, fostering a collaborative and productive testing environment.
- Collaborate with cross-functional teams (development, product, and client teams) at all stages of the software development lifecycle to ensure successful project outcomes.

Skills: Stress resistance, Software testing, Attention to details, Analytical thinking, Bug tracking, Adaptability, Communication skills

QA Engineer, Customer Support Assistant · Get IT · Saint Petersburg

February 2012 - December 2016 · 4 years 10 months

- Perform manual testing of software to ensure product quality and functionality.
- Create, maintain, and update comprehensive test documentation, including test plans and test cases.
- Manage defect life cycle, from bug identification and registration to tracking and resolution.
- Communicate with clients to gather feedback, address issues, and ensure customer satisfaction.
- Register and track bugs and incidents in bug tracking systems, ensuring clear and detailed reporting.
- Collaborate with the technical support team to troubleshoot and resolve client-reported issues.
- Oversee the full lifecycle of support tickets, ensuring timely resolution and effective communication with stakeholders.

Skills: Project Management, Customer relationship management, Customer support, Service orientation, Team player, Communication skills, Adaptability, Stress resistance, Software testing, Analytical thinking, Attention to details, Confluence, Jira, Project management, Bug tracking
